Our dead are greater and more truly alive
than we are. When we forget them, it is
our whole future we lose sight of....

-Maurice Maeterlinck

INTRODUCTION

PARTICLES is a book composed of photographs from my grandmother's doll collection and excerpts from her family history records. The book is divided into three panels that turn independently from one another to create juxtapositions between the parts of the dolls and the sentiments of my ancestors. These combinations sometimes make sense and other times nonsense, just as families combine similar and dissimilar people.

I chose to photograph the dolls because they represent stages of the human body in a fixed state much the same way that a written record of a person's experiences fix fleeting memories. The dolls and sentiments in this book symbolize "the world of the dead."¹ I am drawn to create from this world of my dead ancestors as a way of reflecting on my own identity.

Since we know our body only in parts, the image is what constitutes the self for us; it is what constitutes

| Kirsti & JB | As close together as possible | The boy and girl that won't stop smiling at each other |

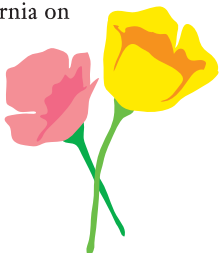

GROWING TIPS

Plant in a sunny location (*Oakland California Temple*) near friends and family in late summer (*August 16, 2003.*) Transplant carefully. Stake or support as needed.

SUGGESTION

For best results, celebrate the start of this happily ever after from 7 to 9 o'clock in the evening at the 51st and Dover LDS chapel (1101 51st Street) in Sacramento, California on Saturday the 16th of August, 2003.
